THE STORY

Rhythm with *intent*. Energy with direction.

SH*T HAPPENS is an Argentine-born, Miami-based DJ and producer whose sets move between house, techno, progressive, minimal and Afro House.

A guitarist before stepping behind the decks, he brings a melodic instinct to every room—building tension with patience, landing the groove with precision and keeping energy in constant motion.

From intimate rooftops to landmark Miami dance floors, his approach is rooted in connection: read the room, tell a story and make every transition feel inevitable.
